1. The difference between Photoshop and Photoshop Elements Adobe Photoshop is one of the most powerful photo editing software available. It is a professional grade digital photography editing software. Elements is a more affordable software, designed for the DIY Photoshop. However, both are industry-leading image editing and photo editing software.

There is no need to use Photoshop Elements to be able

---

to create a powerful image or modify an image. Unlike other Adobe software, Photoshop Elements doesn't provide the ability to edit an image that has a separate layer structure. 2.

What Photoshop Elements offers Photoshop Elements offers more than 300 individual editing tools or filters. The included features include:

- Adjustment layers and curves
- Brightness/contrast and color balance
- Channels and masks
- Effects
- Healing and cloning
- Hue/saturation
- Lighting Loupe
- Masking
- Merge
- Multiply,

---

division, and eraser New  
Brushes Opacity and blending  
modes Paint bucket Pen tools  
Raster/vector tools Removal of  
objects and adjustments  
Saturation/value Sharpen, blur  
and lighten or darken  
Smudge/blur tool Soft/hard light  
Spot healing

Transparency/groups and layers

3. What Photoshop Elements  
offers What can Photoshop

Elements offers? 1. Filters  
Adobe Photoshop Elements  
offers a variety of filters that  
can transform images into a  
video and more. It offers a

---

limited number of adjustment filters in the form of Photoshop adjustment layers. Additionally, Elements offers specialized tools, including new brush and pen tools.

2. Built-in Adjustment Layers All adjustments are made in the Layers panel. There is no separate panel or window you have to open. This often makes Photoshop more complicated than Photoshop Elements. However, Photoshop Elements has similar tools for image editing and adjusts a similar effect on the image.

3. Adjustment Layers With

---

Photoshop Elements, you can make adjustments to images and create artistic effects that can be saved as templates.

Many of the tools and features in Photoshop Elements are similar to those in Photoshop.

However, you can apply adjustments to several different layers, which Photoshop does not allow you to do.

Our Blogs Join Us on Facebook It has been announced by the WCA that it will now be possible to nominate the home of your favourite 2017 London Marathon event for the coveted London Marathon Director's Award. The ballot forms to be filled in by eligible marathon club members who use the WCA's website will now have a designated 'nominate your home' field on each form, should you wish to do so. Should you wish to nominate a

---

home marathon club, you should check with your club and race organiser to confirm that the club is happy for you to nominate it. There is a nomination form [here](#) if you would like to use it. The deadline for clubs to submit nominations is 11:00 on Friday 3rd August 2017. After this date, the WCA's selection panel will look at all entries and select up to five runners to be invited to the presentation ceremony which will be held at the end of August. The WCA would like to thank the clubs who took the

---

time to complete the nominations earlier this year and look forward to the clubs' continued support.

[Percutaneous dilation tracheotomy. Preliminary results]. Early failure rates in surgical tracheotomy reported in the literature still persist. Moreover this procedure is time consuming, with a high incidence of complication and leads to an impaired physiologic barrier. A new technique, the percutaneous dilation tracheotomy (PDT), has been recently described and shown its simplicity, effectiveness and

---

low complication rate. In order to test the real feasibility of PDT technique, we performed in our hospital a preliminary study on patients who required tracheotomy for prolonged mechanical ventilation. We focused on the difficulty of insertion of the technique, the success rate and complications. Between March 1997 and June 1998 we enrolled 10 patients. The average age was 69.2 +/- 6.6 years. 7 were males. All patients were sedated by a midazolam-fentanyl-ketamine regimen. Patients were

---

positioned on the left side. Sedation was checked by pulse oximetry. 7 patients had a history of difficult intubation (5 patients for severe obstructive diseases, 2 for acuteness of trauma). 2 of them had two previous tracheotomies. All patients required PN. Three patients had tracheotomy performed under bronchoscopic guidance, but 5 needed surgical tracheotomy. The average time of the procedure was 1 hour. The average time of dilation before withdrawal was 5 minutes. Average time to

---

removal of the catheter was 34 +/- 17 hours, being sedation the reason of 9 of them. No patient showed signs of bleeding or any other complication. Only one case of minor bleeding from the tissues was stopped by gauze irrigation. The success rate of the technique was 100%. The complications were only minor: mechanical obstruction due to overinflation of the cuff and mucosal breakdown which required an intensive care treatment. In our experience the PDT technique is safe, simple and effective. Although

---

our study did not include a control group, the results of several studies in the literature are encouraging. Further studies are needed to compare this method with other techniques.

Q: What happens when you leave the limits of the physical universe? If our universe had infinite space and time but was bounded by the physical laws of the universe, would it still exist? If we were able to travel infinitely far, would we stop being able to perceive a physical universe? A: The question is: what are the

laws of the universe? The laws of the universe are the set of rules that
