well hello everyone i made a review of the game(didnt know the release would be so soon afterwards) so anyone who's on the fence of buying the game this is a simple turn based gmae but far from simple in difficulty and enjoyment hopefully the video is helpful

[https://youtu.be/5o9Buxu\\_sGI](https://youtu.be/5o9Buxu_sGI). Hero Project has an interesting premise that you are on a superhero "reality show" contest. As such you "vote off" both opponents and friends at various points. I had 2 problems with this part of the story: you get points for sticking true to a "strategy" you choose at the start. However, a lot of the choices are written in a vague manner (I thought) that made it hard to know which fit your "strategy". And this all determines how long you can stay in the show before being "voted off".

The second problem I had with the game is the fact that the author seems to be using the story to push the so-called "alternative lifestyle" issue. Granted, he doesn't take away from the main story when he does, but I don't care about that and never will, so I found being preached at in a superhero story about this issue highly irritating. And with each group jockeying for identity in the coalition the acronym now has so many letters in it it looked like a cat walked across my keyboard.

At points the main character was screwed around no matter what you did I wondered if the author is a fan of Marvel Comics, as it reminds me of their brand of "angst" stories. However, things did work out in the end, mostly. I would recommend if you don't mind the issues I brought up.. i dont know why the ♥♥♥♥ i paid for it. A nice throughback to NES games that was part of my childhood. Fun to play through for nostalgia's sake. :). Having a lot of fun with this one. Addictive, lots of weapons and gear, leveling system, fun and varying enemies, quests and allies to complete, find, a base to build up and defend, procedurally generated map that changes if you die, lots of replayability, enjoyable story (love the diary pages), I could probably go on. My only complaint centers on how you upgrade the base... I fel like it should be as days pass, not as time passes. 5.5 hours for me to upgrade the workbench.... I mean, come on.. Took over a ship and acted like a pirate

10/10. An interesting narration and disclosure of characters contribute to immersion in a unique world that is full of mysteries and secrets. The story tells us about people whose destinies were linked by the ancient city - Aksaypolis. As you read the dialogs, there are only more puzzles, besides, the game also has the ability to choose the answer and influence the ending. In short - this game is a gem among visual novels.

. Beautiful, fluid and unusual.. Was way to laggy when you start to drive but if they fixed that then they are going to come out with a ripper of a game. I recommend this game for creative players. 9/10

A nice alternative to Pinball FX2 VR. The following pros and cons are in comparison to that product.

Pros:

Support for Oculus touch controllers.

Ability to change table height and rotation relative to your viewpoint (makes it more comfortable to play sitting down).

Less expensive.

Cons:

Only one table, however, this game is still in early access.. The first Super Seducer was a masterpiece. Took itself seriously, but with a couple jokes and humor thrown in. The 2nd, not so good. If you loved #1 as much as I did, don't get this one. It's just cringy and bad jokes after bad jokes. I'm seriously disappointed. I thought it would be as "serious" as the 1st one was.

EDIT: After speaking with Richard, the game's creator, I understand more the reasons SS2 is made the way it is. I am not changing my review, but I understand. I hope SS3 will go back to how SS1 was, or at least a mix of both.. A game where you can be what you always wanted to try. Just yesterday I streamed this with a friend and it was even more fun than I expected.

It is a little sad that there are not many campaign mission (there seem to be 6 without the tutorial mission). But there is a random missions mode which accounts for some replayability. The non-VR controls work great (recommend controller for 2 out of 3 ship types) and I am happy that they added this mode. Would like to try it in VR though since I can imagine it being even more intense.

Nominated it for the "Better with friends" award and I hope it will be a good fit for you too.. 10/10 would drink again. Spooky! >:O. Game looks great, Controls are GARBAGE. Supposed to be relaxing and I cant get over the fact I can never use the mouse but need to keep my hand on it the entire game, but you dont use it for steering your plane, that would be too intuitive! you use the keyboard for that silly !. good game with friends but hard to find friends to play with. overall good game
